

The ProLinea Shootbolt Espag combines steel shootbolts & mushroom cams to provide an enhanced security window locking system.

Mila has been the UK's leading distributor of hardware to the replacement window & door industry for over 30 years. Our comprehensive product range includes our own innovative Mila brand products, designed & developed in-house, as well as other market-leading brands enabling us to offer value, mid-range & premium product solutions to every customer, for almost any application, in every market sector.

- Stainless steel or mild steel shootbolt extensions
- Options of 8mm, 9mm mushroom headed steel cams
- Slide 'n' fix technology for quick & easy extension fitting
- Meets the enhanced security requirements of BS7950
- Meets the Police Preferred Specification requirements of Secured by Design
- Operational reliability - tested to 50,000 cycles
- Corrosion resistant - tested to 240 hours salt spray
- Options of 20mm & 22mm backset
- Backset size marked on gearbox for easy identification
- Available in 118mm - 718mm to suit a range of window sizes
- Suitable for PVCu, timber & aluminium applications
- Strikers available to suit

ProLinea Shootbolt Espag Window Locking System

The ProLinea shootbolt espag window locking system, manufactured from high grade steel and zinc alloy, offers enhanced window security through a combination of mushroom headed steel cams and shootbolts, both with 16mm travel.

Designed in-house the robust reverse action gearbox features unique, concealed twin pinion technology to ensure smooth operation and durability. The compact gearbox has been designed to require minimal routing to ease fabrication. Backset sizes are clearly marked on the gearbox, 20mm or 22mm, for quick identification.

To speed fabrication slide tags simply slide over the shootbolt couplings and can be easily fix into place.

Mushroom cams, 8mm or 9mm, are 1mm compression adjustable with a 3mm Allen key and feature an orientation mark on the cam.

Stainless steel and mild steel

shootbolt extensions are available in 4 sizes to suit application sizes from 300mm - 1600mm. Sizes accommodate both standard and reduced depth Euro grooves

Suitable for both side hung and top hung applications and both standard and reduced depth eurogrooves, this high security espag is available in a range of lengths, in 20mm and 22mm backsets, to suit PVCu profile systems as well as timber and aluminium.

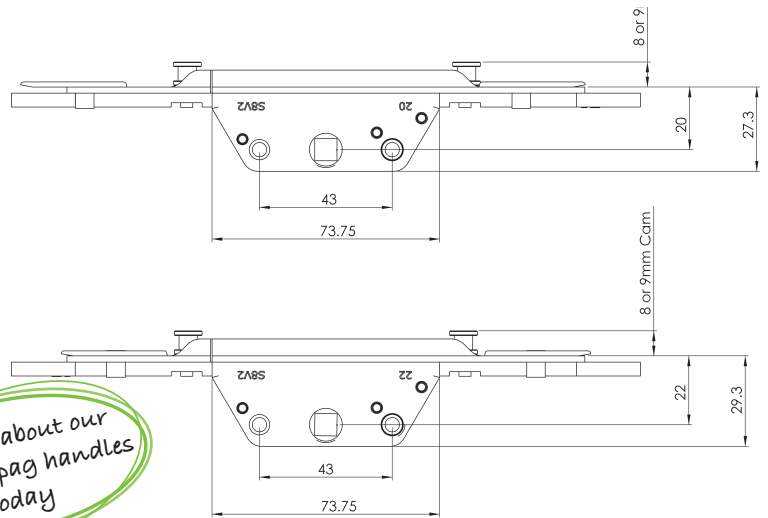

The ProLinea shootbolt espag has been successfully tested at the UKAS accredited Mila Test Centre to the enhanced security performance requirements of BS 7950, has achieved 50,000 cycles - more than twice the standard requirement - to ensure operational reliability, 96 hours salt spray to ensure weather resistance and meets the enhanced security requirements of Secured by Design.

Strikers are also available.

Technical Specification

Material	High grade steel & zinc alloy
Backset	20mm or 22mm
Mushroom Cam Height	8mm or 9mm (+/- 1mm for compression)
Travel	16mm
Faceplate	16mm
Size Range	Min. 330mm - Max. 1600mm
Cycle Tested	50,000 cycles
Salt Spray	96 hours
