

Supa™

Stainless Steel Escutcheon Range

Intelligent design. Proven long-lasting finishes.

SUPA™ ESCUTCHEON RANGE

Mila's new range of Supa™ stainless steel escutcheons combine long-lasting finishes with intelligent design and proven strength and reliability. They have been corrosion resistance tested to over 1000 hours and are guaranteed for 25 years. A superior stainless steel range indeed.

The Supa™ escutcheon range includes four stainless steel designs - security, standard, security pull and standard pull.

The range has been designed by Mila's in-house product design team and incorporates a range of smart design features including clip-on covers to conceal screw fixings and chamfered shoulders on the security versions to provide anti mole-grip resistance.

The escutcheons are manufactured in grade 304 stainless steel (Supa secure, Supa secure pull and Supa pull versions) as well as 316 (Supa standard version) which is marine grade, perfect for coastal regions and areas of high pollution.

Our Supa™ stainless steel escutcheons have been independently tested to the latest British

Standards at Exova including BS EN 1670:2007 Grade 5 achieving 480 hours salt spray for proven weather resistance. The security versions are Secured by Design accredited, BSI Kitemarked and CE marked.

Supa™ stainless steel escutcheons are supplied with a 25 year surface finish guarantee*.

The range is available in a choice of 3 suited colours - polished stainless steel, polished gold stainless steel and brushed satin stainless steel.

Suitable for PVCu, Composite, Aluminium and Timber doors.
