

A detailed close-up photograph of a metal multipoint lock mechanism. The image shows several rollers and bolts protruding from a metal housing, which are used to secure a door. The metal has a brushed, industrial finish.

The Evolution multipoint lock. Synonymous with superior security.

Smooth locking operation & enhanced sealing via adjustable roller cams, secure multipoint locking achieved through a combination of strong die-cast hooks & anti-lift bolts, complemented by a deadbolt housing anti-saw pins.
