Finishes Satin stainless steel, polished stainless steel, gold pvd

Evolution Door Handle Pz 92

The Evolution door handle is an enhanced security handleset designed to protect against three common types of attack:

- Cylinder snapping - the cast steel design and enhanced screw fixings means that it is practically impossible to remove the handle backplate to gain access to the cylinder
- Cylinder de-plugging - an integral anti-plug disc secures directly over the cylinder
- Cylinder drilling - the anti-plug disc spins if attacked with a drill. This prevents the drill bit from accessing the cylinder

■ Two backplate sizes available:

A variant: 220mm to suit most standard Pz 92 multipoint locks

E variant: 240mm to suit Mila Master and Paddock Lockmaster multipoint locks

■ Reversible for left & right hand doors

■ Available in a range of attractive finishes including Gold PVD and Chrome PVD

Part Numbers
